

PADI/DSAT TRIMIX

6 days

Costs include:
Extra coasts:

Manual, Certification, Gas mixes, Boat Trips
Equipment

COURSE STANDARDS AND OVERVIEW

The DSAT Tec Trimix Diver course is intended to extend the depth range available to technical divers trained and qualified to use air, enriched air and oxygen for technical decompression dives beyond 50 metres/165 feet in open water. The DSAT Tec Trimix Diver course is intended for technical divers certified as DSAT Tec Deep Divers (or qualifying certification from another training organization). The course extends their depth range capabilities by training them in the use of trimix (helium, oxygen and nitrogen).

After successful completion of the DSAT Tec Deep Diver course you'll be able to conduct gas-switch extended no-decompression dives, decompression dives and accelerated decompression dives using air and enriched air to a depth of 50 metres/165 feet. You'll also understand the hazards and risks involved in technical diving, as well as how to prepare for and handle reasonable foreseeable technical diving emergencies

Prerequisites

To qualify for the DSAT Trimix course, an individual must:

1. Be certified as a DSAT Tec Deep* and 200 logged dives
* or have a qualifying certification from another training organization.
2. Be 18 years of age or older.
